

William Kenyon®

Pulp and Paper

- **William Kenyon® manufactures top slitters and anvil knives for all of the major winders and re-winder stands in use today using the highest quality tool steel of your choice and precision manufacturing processes. Each knife is etched with the alloy type, special treatment specifications, and customer part number to simplify inventory maintenance and tracking of the products performance.**
 - Anvil knives with a solid carbide ring available.
 - A large inventory of standard knives and anvils is maintained for quick delivery.
 - Non-standard and custom knives available.
 - Stocking programs are available for non-standard and custom knives.
- **William Kenyon® has the technology and manufacturing processes in place and is committed to supplying the paper and converting industries with the highest quality, close tolerance, circular and flat knives for all of your converting and slitting requirements.**

At William Kenyon® our aim is not to re-invent the wheel, but to make it run smoother and longer.
